

John Gray

Software Engineer | Entrepreneur
New York, NY | johngraydev@gmail.com
[Portfolio](#) | [LinkedIn](#) | [GitHub](#) | [Wadjet LLC](#)

SKILLS

Programming Languages | TypeScript, SQL, JavaScript ES6+, Python 3, C#
System Design | GraphQL, Microservices, Domain-Driven Design, RESTful APIs, Pub/sub, Event-Driven Design
Frontend | React, NativeWind, Bootstrap, Chakra UI, Highcharts, Figma
Backend | Node.js, PostgreSQL, MySQL, FastAPI, Django 4, MongoDB, WebSockets, Chrome Extension
DevOps | Jest, Cypress, Playwright, pytest, FastAPI TestClient, AWS, Docker
Operations | Agile, Project Management, Scrum, Jira, Customer Research, Business Development

PROFESSIONAL EXPERIENCE

Full Stack Developer Volunteer | Change Climate Project | [changeclimate.org](#)

Jun '24 – Present

React, Node.js, TypeScript, CI/CD, Cypress, Python, Chakra UI

- Contribute to and maintain a production application with dynamic UI using React and Chakra UI
- Ensure code quality and reliability with unit and component testing (Jest) as well as end-to-end testing (Cypress)
- Use Jira to facilitate Scrum practices with a distributed team in an Agile environment, working proactively for fast turnover

Founder & CEO | Wadjet LLC | [wadjet.com](#)

Apr '20 – Present

Node.js | React Native | TypeScript | Python | Client-Server Integration

- Created a plugin which scrapes and analyzes project data to inform booking decisions and double revenue every year of operation
- Programmed software to automate formatting and integration of subtitle/caption files into deliverables, trivializing entire workflows
- Designed company website with SEO optimizations to draw browser traffic and partner with 12 companies across 5 countries
- Developed project management workflows to run this single-person LLC and deliver voice over for over 350 programs annually

RELEVANT PROJECTS

Tell - Audio Description Delivery Synced with Theatre Management Systems

Jun '25

React Native | Node.js | TypeScript | MySQL | Expo | Tailwind

- Built a custom audio player that interfaces with theatres' systems to dynamically sync AV and restrict playback to screening times
- Architected a relational DB integrated with Google Maps, Places and TMDb to randomly generate realistic TMS schedules
- Prioritized blind users by designing accessibility-first UI/UX features.
- Used Tailwind/PostCSS pipeline for consistency across platforms

Booky - Book Club & Social Media Betting Platform

May '24

React | TypeScript | pytest | PostgreSQL | FastAPI | Docker

- Architected a Dockerized full-stack application with modular backend routers, JWT auth, and relational database modeling
- Implemented asynchronous programming to craft a fun betting system that positively reinforces user participation
- Tested backend with pytest + FastAPI TestClient and enforced formatting/linting with Black, ESLint, and Prettier
- Built REST APIs and consumed external services (Google Books API), with robust validation, error handling, injection

4Sight - Mobile Game Engine & App

Jan '26

React Native | TypeScript | Jest | Expo SDK | RN Reanimated

- Integrated a modular game engine and downloadable extras using provider-based state management and slice hooks
- Orchestrated modular asynchronous RN Reanimated animations
- Persisted game and settings state with AsyncStorage
- Implemented component-level tests (Jest + @testing-library/react-native) and ensured a scalable architecture for iOS

EDUCATION

Hack Reactor - Full-Stack Software Engineering Immersive Program

May '24

College of the Holy Cross - Bachelor of Arts English

May '15
